References Category:3D graphics software Category:Media plugins Category:3D graphics software for Linux Category:Graphics software that uses GTKQ: Carousel in R Shiny This is my first question. I would like to create a carousel in Shiny. For that, I'm trying to learn how to do it from example code but I cannot get it working. I cannot find good tutorials and this seems to be an "easier" way to do it, so maybe someone could point me to some advice on this issue? Here is what I did: Created a simple dashboard in R Shiny. Manually created a carousel using this example code. Added the dynamic slider from here. Integrated it. You can find the example code from
