Q: How to find field with highest value in Laravel with Eloquent ORM? I have table with two columns, month and year. I want to find in this table all rows with month = "01" and highest year. A: You can do it like this: \$result = YourModel::where(function(\$q) use (\$conditions) { \$q->where('month', '=', '01') ->where('year', '>', DB::raw('max(year)')); }->get(); Q: Opciones de SQLException Hola amigos estoy intentando enviar datos con una consulta y si esta no selecciona nada y se queda pegado en la sentencia ya sea por el uso de los signos de interrogaciones o por la poca cantidad de datos enviados por mis códigos, me dice un error como este: Opciones de SQLException ya que uso un FETCH. Y cada vez que pongo un nombre de tabla que no existe ya me dice esa error y quisiera saber como hacer para que no me diga esa error y que me muestre una excepción en la pantalla. A: Tendrías que usar el método execute() para t
