Here's what I did: - I am working in a network environment and for some reason the program doesn't recognize my mouse or my keyboard, so I have to use the trackpad, like this: A: OK, I found a solution. I guess I might get accused of spamming, but I thought I'd share it here for whoever has the same issue, and I might as well get it out of the way before the server decides to go down. I was actually able to install SketchBook Designer by downloading the installer file directly from the Autodesk website and following the instructions that were provided in the installation wizard. After installing it, it looks like I had to reset the program and then it worked. So I guess the problem was that somehow the auto-detect didn't work, so you need to do the manual installation for SketchBook Designer to work properly. Category: Experiences Congratulations to all of our graduates who graduated this year, as well as to our new graduates who were able to come in over the summer. We have had a great experience over the past few years at the Graduate School and have enjoyed both working alongside the faculty and seeing each other's passion for teaching and learning. We wish you all the best in your future careers. The Graduate School has a rich tradition of providing professional development opportunities and resources to our faculty. This summer, the Graduate School has taken a large step forward by developing a first-of-its-kind faculty mentoring program, called SMARTS, in order to support and facilitate faculty development efforts in the Community of Practice. SMARTS is led by the community of practice leadership team, made up of faculty, program coordinators, and administrative staff. The goal of the SMARTS program is to provide a combination of online and face-to-face professional development opportunities to faculty across the country. The online portion of the program includes a 2-day annual faculty development webinar and a faculty development manual to support faculty in their work. The face-to-face component of the program includes personal coaching and feedback from both professional development leaders and peers, as well as focused monthly lunch and learn sessions. These opportunities will be provided in a supportive and safe environment, with the ability for faculty to identify how they can further their own professional development. In total, we anticipate a 12-week, 2d92ce491b
