AutoCAD is a platform-independent application that runs on a variety of operating systems, including Microsoft Windows, Linux, macOS, and Unix. There are separate version numbers for the AutoCAD software on Windows, Linux and macOS, which include desktop versions, mobile versions, and web-based versions. AutoCAD is the best-selling CAD software application in the world, in terms of both units sold and number of users. In January 2016, Autodesk reported that AutoCAD had 2.8 million active users. Autodesk AutoCAD has been a best-selling application for more than 30 years. AutoCAD is also compatible with AutoCAD LT. History AutoCAD was developed in 1981 by Ken Krogue as a side project while working at Seattle Computer Products in a subdivision called "Studio, AutoCAD." It was created as a cross-platform 3D CAD system, the first available on personal computers. The idea of the software was conceived by Krogue while working on a project for the National Park Service, mapping the geological features of a mountainous area near Tonto National Forest in Arizona. Although Krogue developed this software in 1981 as a hobby, the National Park Service had no idea that the program would ever reach the public. In 1982, Krogue presented a demo of the software to a group of high school students. The program was considered a "major breakthrough" in the design field, and was well received by these users. After seeing the demo, Krogue knew that he had created a software program that would find commercial success. Krogue chose the name "AutoCAD" for his software as the name stood for both automatic and computer-aided design, but also for "automated drafting," to suggest the amount of time and effort that go into the design process. On November 4, 1982, Autodesk Inc. was incorporated in the state of Washington. It is the first software company to be formed in Seattle. AutoCAD 1.0 debuted in December 1982, the same month as the Apple IIe, which was a significant milestone in the introduction of the personal computer. The Apple IIe was capable of graphics of a resolution of 640 by 200 pixels, about one-half the resolution of the previous generation. For this first version of AutoCAD, Krogue wanted a system that would allow AutoCAD to work well in this less-than-perfect environment. This first

It was the first official Canadian presence in the United States since Bill C-51 became law. To put things in perspective, I'd like to share the story of the last major embassy opening I participated in. The Ministry of Foreign Affairs and International Trade had just presented the Canadian ambassador to Spain with his orders for our new embassy in Madrid. I was asked to be the observer of this historic event. On the day, the ambassador was on an inspection tour of the new embassy. I accompanied him, looking after the legal and diplomatic work. At the end of the tour, the ambassador stopped for a chat. As we were looking at the Canadian flag in the entrance hall, I asked if he wanted to make a Canadian flag out of a Canadian flag. We got to work, and in no time I had my brand new hand-made Canadian flag. The ambassador was touched and excited. A few days later, he was leaving Madrid for Ottawa. So, what was I doing on the night of the official opening? I was on my own, in the empty space where the ambassador had sat and enjoyed that Canadian flag. I was sitting on it and thinking about what it meant to my country and me. I thought about the history of our relationship with Spain, our culture, our food. I was proud. In the end, the ambassador and the delegation had a grand party for 100 diplomats and the embassy staff. It was an impressive moment. I remember thinking that, for the past 45 years, Canada has been a sort of embassy without a country. Canada was represented abroad by the Canadian embassy in London, not in Washington. Over the years, I had lots of questions about that situation, but it was a taboo to talk about. Canadians didn't see it as a problem, they saw it as a way to get to know other Canadians. So, in 2009, while I was foreign minister, I had a special bilateral meeting with U.S. secretary of state Condoleezza Rice. I couldn't have imagined then that this would be the
