As I want to reproduce the exact same image in a different plot and save it again I tried to include ggsave() again. But with ggsave() gsave(filename = paste0("plot_", cells$rownames[cells$loc == 0], ".eps"), width=6.5, height=6.5, units="in", device="epsc", dpi=150) It saves the plot just as it should but not with the same visualisation as in the first plot. Is there any way to save the same plot again with the same print commands? Thanks for your help A: The answer is yes, with a slight trick: plot1 09e8f5149f
